Microelements

- Dust free and free flowing products due to innovative microgranular formulation.
- Single micro nutrient and combination of multiple micro nutrients are available.
- All nutrients in every microgranule are made via spray dried production technology.
- Effectively prevent and replenish micronutrient deficiencies.
- Formulated with K-EDTA instead of Na-EDTA – sodium free and highest solubility.

Different technologies for different requirements

- Fe-EDDHA for fertigation on alkaline soils (6% Fe; 5% ortho-ortho Fe)
- Fe-EDTA (13%), Zn-EDTA (15%) for foliar application to prevent and cure deficiencies (with Potassium).
- Liquid Boron formulation with high Boron content for Boron demanding crops.
- Guaranteed analysis.
- User friendly and flexible packaging sizes (1kg and 25 kg)

Combi Micronutrient compound/microgranular fertilizers for horticultural crops to prevent and cure micronutrient deficiencies
